# SHOULD I BUY PANTS OR CHAPS?

## START

How often do you use a chainsaw?

Regularly

Infrequently

### PANTS

Pants are a great option for you. We have a product for every use (we do Men's and Women's fit too).

#### Benefits of pants include:

- Pants have no snagging hazards.
- Always have your chainsaw protection with you, no time wasted putting on chaps.
- They are a personal garment so pants are generally more comfortable.

### CHAPS

Chaps are a great option for you and are a unisex garment.

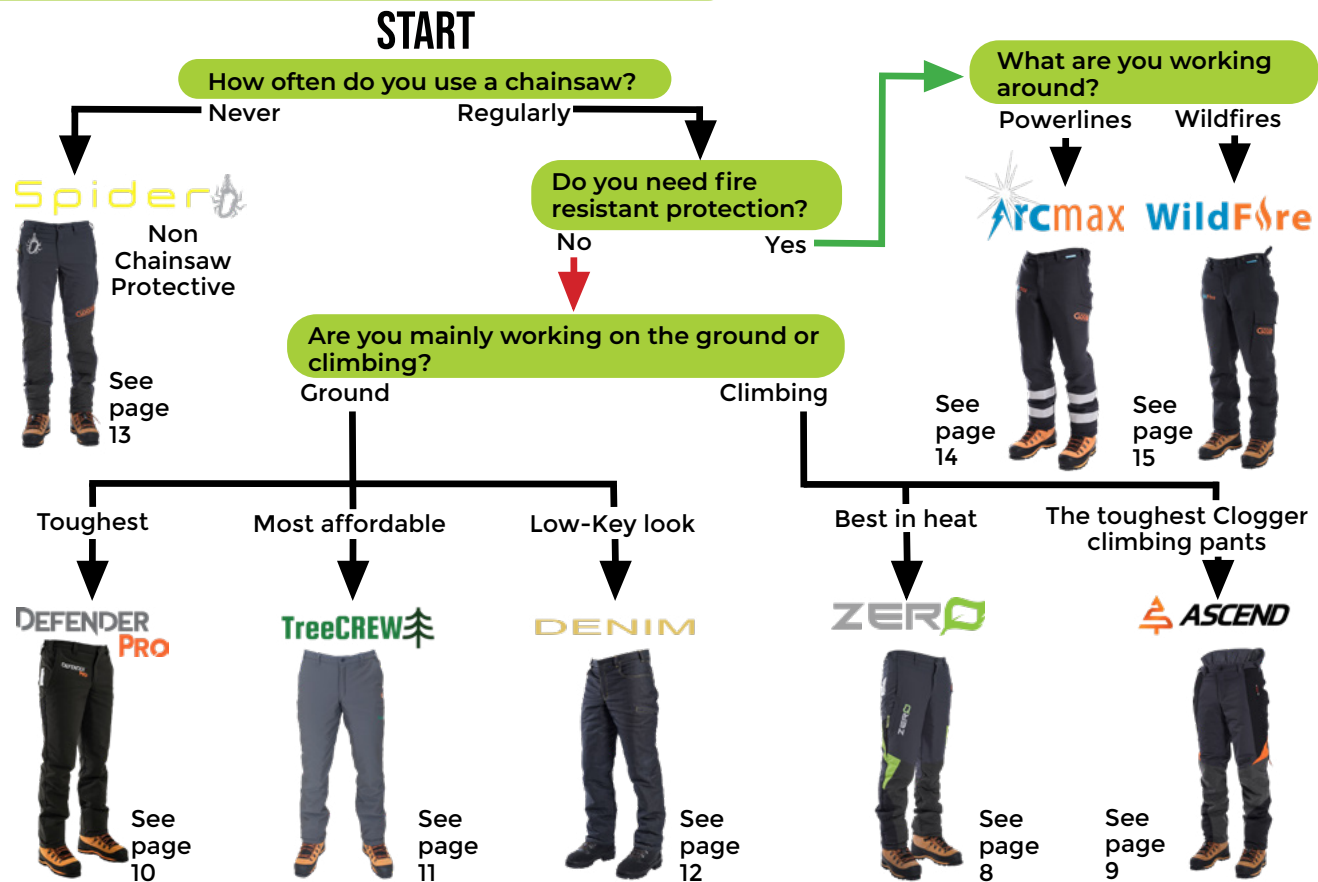

#### Benefits of chaps include:

- Chaps are an over garment, not a personal garment, perfect for when there are going to be multiple people going to wear them.
- Size options fit most people since the waist is highly adjustable.

# WHICH PANTS ARE BEST FOR ME?

# A GUIDE TO LEG LENGTHS- PANTS

**Ever bought or tried on pants that are too long and baggy, or so short in the leg that when you sit down they don't even cover your ankle anymore? It's not a great experience when this happens!**

We understand that not everyone is a standard height- this is why we offer short, standard, and tall leg lengths across our pants range to cater to a diverse range of customers.

Giving more options to our customers also means they will be less likely to have to order a custom made garment- though this is still an option for anyone who needs it.

**SHORT (-6CM)**

All short styles are **6cm shorter** than the standard leg length.

**STANDARD**

In our other climbing pants, short styles are 6cm shorter and tall styles are 6cm taller than the standard length.

For our ground pants, short styles are 5cm shorter and tall styles are 5cm taller than the standard leg

**TALL (+6CM)**

All tall styles are **6cm taller** than the standard leg length.

These images show the ideal amount of bunching at the bottom of the leg.

## PANTS

Built for those who want to be fully covered. For those who jump into their gear in the morning, and get the day started. For those on the ground and in the trees. For those who stretch, reach, swing, jump, twist, turn, and climb. These are for you.

## WHICH CHAPS ARE BEST SUITED FOR ME?

### START

Are you a professional or occasional chainsaw user?

Professional

Occasional

C8 chaps are a simple option for the occasional user that needs protection

See page 21

Do you need fire resistant protection? Yes

No

Are you looking for the best chaps for the heat, or the toughest?

Best in heat

Toughest

What environment are you working around?

Powerlines

Wildfires

See page 19

See page 20

See page 22

See page 23

# A GUIDE TO LEG LENGTHS- CHAPS

## SMALL (-7CM)

All small styles are 7cm shorter than the Medium leg length.

## MEDIUM

Note: Medium, Small and Large chaps are the same leg lengths across all of our brands of chaps.

## LARGE (+7CM)

All large styles are 7cm taller than the Medium leg length.

Chaps have an adjustable waist belt up to 125cm, meaning they can fit a large range of customers at the waist. Due to this (and the waist belt being the same through sizes), chaps sizing is based on leg length.

Another way to look at chaps sizing is as follows:

**Small** = Short leg length  
**Medium** = Standard leg length  
**Large** = Tall leg length

# ZERO

# BEST FOR THE HEAT

RRP: \$295

## IDEAL FOR PROFESSIONALS, COUNCILS AND LANDSCAPERS

AND SUMMER USE**

# IZING

To ensure you get the correct size for you it is best to check our sizing charts.

## IMPORTANT:

Our climbing pants (Zero, Spider, and Ascend) across Tall, Standard and Short, all include an additional 6cms/2.5 inches of length to allow for lift from the harness and knee flex/bending while climbing.

Our ground pants (DefenderPro, TreeCREW Arcmax, Wildfire and Denim) all include an additional 5cms/2 inches of length to allow for lift from kneeling and knee flex/bending.

If you are unsure which size is the correct one for you, feel free to email us at [sales@clogger.co.nz](mailto:sales@clogger.co.nz) so we can help find the perfect fit for you!

### SNAKESAFE SIZING

Size	Calf Circumference (Person)		Actual Girth of Gaiters	
	CM	IN"	CM	IN"
S	32-36	12.5-14	45	18
M	36-40	14-15.5	49	19.5
L	40-44	15.5 -17	53	21
XL	44-48	17-19	57	22.5

#### Notes:

Calf circumference is measured at fullest point

These gaiters are designed to be worn over the top of outer clothing so there is a certain amount of "looseness" built into the design

### ARM PROTECTORS

Size	Forearm Circumference		Wrist Circumference		Sleeve Length	
	CM	IN"	CM	IN"	CM	IN"
S	35	14	25.5	10	25.5	10
M	39	15.5	28	11	27.5	11
L	43	17	30.5	12	29.5	12

### VEST SIZING

Size	Fits Chest		Back Garment Length	
	CM	IN"	CM	IN"
S	94	37	87	34
M	102	40	89	35
L	110	43	91	36
XL	118	46	93	36.5
2XL	126	49	95	37

#### Notes:

Chest is measured around the fullest point.  
Back garment length is measured from the centre of the neck, straight down.

### ALL CHAPS (UNISEX SIZING)

Size	Overall Length of Garment		Fits Person With Inleg Length		Maximum Ankle Circumference (360° only)		Maximum Calf Circumference (360° only)	
	CM	IN"	CM	IN"	CM	IN"	CM	IN"
S	91	36	68-74	27-29	46	18	50	19.5
M	98	39	74-80	29-31.5	46	18	51	20
L	105	41	80-86	31.5-34	49	19	53	21

## CUSTOM GARMENT SERVICE

Most garments in the Clogger range are available in a custom size. Simply specify the particular body measurements required when ordering. It is important that these are accurate body measurements, as custom made garments cannot be returned for a credit.

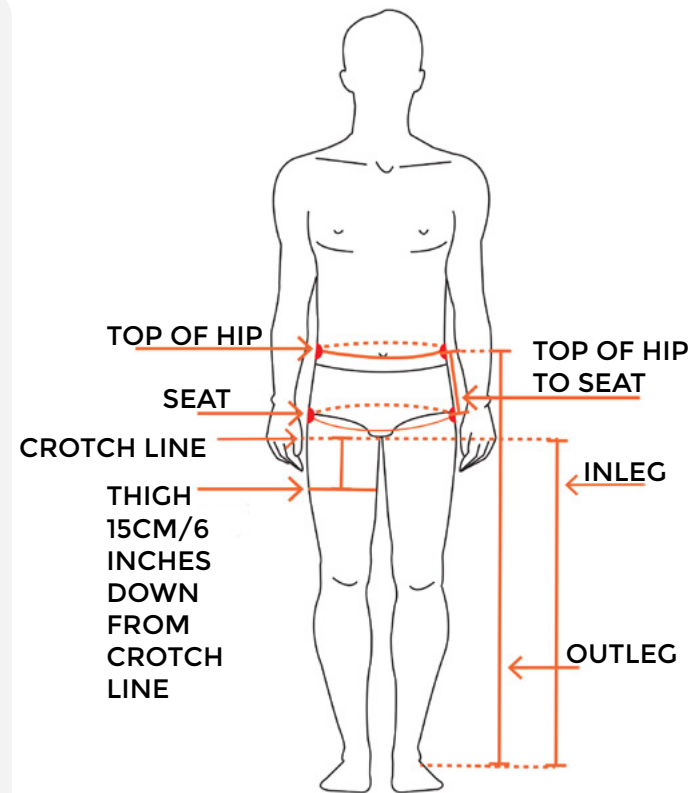

See the diagram for help on taking the measurements.

For chaps we need the following measurements:

- Top of hip circumference (where waist belt will sit).
- Outleg (distance from top of hip to 2.5cm/1 inch below ankle bone).
- Thigh circumference (if top of hip circumference is greater than 140cm/55 inches).

For pants we need the following measurements:

- Top of hip circumference (where the waistband will sit).
- Seat circumference (fullest part of buttocks).
- Top of hip to seat.
- Outleg (distance from top of hip to 2.5cm/ 1 inch below the ankle bone).
- Inleg (distance from crutch to 2.5cm/ 1 inch below the ankle bone).

## ADVANCE YOUR GUARD

Chainsaw protection must do more than stop a chainsaw. It must be long-lasting. It must be comfortable. It must perform in the conditions it was designed for. Meeting the standards is just the beginning.

But let's start at the beginning. All Clogger chainsaw protective pants and chaps are certified by Bureau Veritas NZ Ltd to the Australian and New Zealand standard, AS/NZS 4453.3:1997. The standard doesn't allow for any cut-through at all.

Furthermore, certification status involves the demonstration of an on-going testing procedure, along with regular audits to check documentation and other internal processes. We welcome any reason to spend more time in our custom-built laboratory, so this suits us.

**AND THAT REALLY IS JUST THE BEGINNING. NOW LET'S TALK FABRIC...**

## FABRICS

Arrestex HP is a high-performance chainsaw protective fabric.

Traditionally chainsaw protective fabric works by clogging the sprocket with hundreds of tough polyester, polypropylene, or nylon fibres. The Clogger R&D team decided to go a step further and developed a high-performance fabric. It incorporates super high strength and cut resistant fibres, improving the protective pad's performance significantly; without adding weight or bulk.

ARRESTEX HP both clogs, and resists cutting.

Arrestex FR builds on Arrestex HP by adding 100% fire and arc resistance; it will not melt nor drip. This fabric has been developed for whenever there is an extreme heat and fire hazard, and the regulations require non-melting garments. We urge you to make sure you protect yourself with Arrestex FR. It is the only truly fire resistant chainsaw protection we know of.

## CERTIFICATIONS

### Pants and chaps

All Clogger pants and chaps are Certified by Bureau Veritas NZ Ltd to the Australian and New Zealand standard, AS/NZS 4453.3:1997 (20 m/s chainspeed).

### Wildfire pants and chaps

Certified by Underwriters Laboratories (UL) to meet NFPA 1977 Standard on Protective Clothing and Equipment for Wildland Fire Fighting.

**STOPPING A CHAINSAW IS THE STANDARD, AND WHEN WE SPEND MOST OF OUR TIME IN THIS GEAR, WE WANT MORE THAN SOMETHING STANDARD. THIS IS WHY CLOGGER IS WORKING CLOSELY WITH CHAMPION TREE CLIMBERS, INDUSTRY EXPERTS, ACADEMICS, AND THE PEOPLE THAT WEAR OUR PRODUCTS EVERY WORKING DAY; SO WE CAN MAKE SURE OUR PRODUCTS GO ABOVE JUST PROTECTION. THE DEMANDS OF THE JOB ARE UNIQUE AND THIS MEANS THE PRODUCTS MUST BE UNIQUE TOO.**

## REAL FIRE RESISTANCE: THE ARCMAX STORY

The regulations (NFPA Code 70E) are very clear. Where there is a risk of an arc flash, the worker needs to wear fire resistant PPE. Nothing should melt. Nothing should drip.

At the beginning of the Arcmax story are the regulations. Those famous regulations that have been designed and put in place to protect workers in their jobs. But this is only when they are followed. And at the beginning, there wasn't anything on the market that adhered to them. Nothing. Traditional chainsaw fire resistant protection simply places a layer of fire resistant fabric over the chainsaw protective one. How protective is that chainsaw protective fabric? Perfectly flammable. Perfectly meltable. In the event of an arc flash or extreme heat? The fibres ignite, melt or drip. They continue to burn. Where? Into the skin. Causing terrible burn injuries.

**Arcmax. It's different. As far as we know, it's also a world first. The chainsaw protective fabric has been specially developed to be fire resistant. It will not ignite. It will not melt. It will not drip.**

Arcmax has been developed, designed, and tested to strictly adhere to the regulations. In arc testing, it achieved an incredible Arc Thermal Performance (ATP) value of 11 cal/cm<sup>2</sup>. If you are working where there is an arc or fire hazard; on power line clearance work or around wildland fires, then you need to make sure that your chainsaw protection will protect you. It has to be fully fire resistant. Look for the Arcmax or Wildfire logo.

Clogger has been quietly going about business from the bottom of the world for the last 29 years, manufacturing remarkable protection for remarkable people.

Invercargill might be one of the southernmost cities in the world but that's never been an issue. We are only a short flight from Australia where we are at home, out in the field, with the professionals that wear our gear. We've made our reputation by manufacturing remarkable protection for remarkable people. That'll never change.

#### CLOGGER HQ

Invercargill is a city of approx 55,000 people. It is famous for being the southernmost city in New Zealand and is the homebase of Clogger!

## THE CLOGGER STORY

EST  
**1994**

Our journey began in 1994. We knew there was a need to make PPE that didn't just meet the standards but also the expectations of the professionals wearing them. Making gear tough is easy enough. Making it tough and performance enhancing is something else.

But that's what we do. We make gear for professionals that demand more. Professionals with dangerous and difficult jobs. Our job is to make it easier for them to do theirs.

You'll notice we use the word 'remarkable' a bit. That's because it's enshrined in our purpose of 'creating remarkable experiences in the lives of people'. We're a family business who care about the people who work for us, and the people we all work for (that's you - the wearer).

We want to make a difference and do something remarkable for everyone - to continue to build on these first 29 years of working with the Australian tree care industry, many of whom can attest to having their lives

## DESIGNED & MADE IN NEW ZEALAND

New Zealand - Aotearoa is its Maori name. A country where nature and landscapes inspire people daily. Where visitors come with the expectation of being blown away by the beauty of the scenery. Where they are also surprised by the welcoming and warm culture of New Zealanders. At Clogger, this is at the core of our identity. We never stop looking at nature and the challenges it presents to the people working outside. We want to protect and support chainsaw users in their job.

We want to connect the needs of chainsaw users and our expertise. We want to exceed the expectations of the industry and establish new norms. Every day we combine creativity and the power of technology to offer the best. This is our goal. This is our mission. This is what we do.

## OUR GUARANTEE

### FEEDBACK

The Clogger team values your feedback. Without it our products would not be what they are today. If for any reason you are not satisfied with a product or you have a suggestion that would help us in future design decisions please call us on: +1 302 459 6822, contact us via email [sales@clogger.co.nz](mailto:sales@clogger.co.nz) or on social media
