

# 3M™ Protective Coverall 4570

## Technical Datasheet

### Description

The 3M™ Protective Coverall 4570 range of coveralls are designed to help protect against hazardous dusts (Type 5), light liquid splashes (Type 6), low pressure liquid sprays (Type 4) and high pressure liquid jets (Type 3).

### Approvals

These products are type examined by SATRA Technology Europe Ltd., Notified Body number 2777 and audited annually by SGS, Notified Body number 0598.

These products are CE marked to the requirements of European Regulation (EU) 2016/425.

The CE Certificate and Declaration of Conformity can be reviewed at [www.3m.com/Body/certs](http://www.3m.com/Body/certs)

### Comfort and protection

|   |                          |   |
|---|--------------------------|---|
|    | <b>Liquid protection</b> | Type 3 and Type 4 (EN 14605) and Type 6 (EN 13034)                                |
|    |                          | Whole suit full and reduced spray test (EN ISO 17491-3)                           |
|    |                          |   |
|  | <b>Dust protection</b>   | Type 5 (EN ISO 13982-1) Inward Leakage results: Ljmn,82/90 < 30 %; LS,8/10 < 15 % |
|  | <b>Anti-static</b>       | Anti-static coating (EN 1149-5:2008)*   |
|  | <b>Nuclear</b>           | Radioactive particulates (EN 1073-2:2002), Class 2                                |
|  | <b>Biohazard</b>         | Tested according to EN 14126:2003 (Type 3-B, Type 4-B, Type 5-B, Type 6-B)        |

⚠ All apparel must be suitably grounded for anti-static treatment to be effective. Electrostatic propensity may decrease with wearing time and/or severe conditions.

### Materials

|           |                              |
|-----------|------------------------------|
| Suit      | Polypropylene/polyethylene   |
| Zipper    | Metal/nylon/polyester braid  |
| Elastic   | Synthetic rubber (non-latex) |
| Seam tape | Polyethylene                 |
| Thread    | Polyester/cotton             |

This product does not contain components made from natural rubber latex.

### Sizing

An appropriate size garment should be selected to allow sufficient movement for the task.

|     | Height  |           | Chest   |           |
|-----|---------|-----------|---------|-----------|
|     | in      | cm        | in      | cm        |
| S   | 64 – 67 | 164 – 170 | 33 - 36 | 84 – 92   |
| M   | 66 – 69 | 167 – 176 | 36 – 39 | 92 – 100  |
| L   | 69 – 71 | 174 – 181 | 39 – 43 | 100 – 108 |
| XL  | 70 – 74 | 179 – 187 | 43 – 45 | 108 – 115 |
| XXL | 73 – 76 | 186 – 194 | 45 – 49 | 115 – 124 |
| 3XL | 76 – 78 | 194 – 200 | 49 – 52 | 124 – 132 |
| 4XL | 78 – 81 | 200 – 206 | 52 – 55 | 132 – 140 |

### Use limitations

Do not use for:

- ▶ Contact with heavy oils, sparks or flame, or combustible liquids
- ▶ Environments with high mechanical risks (abrasions, tears, cuts)
- ▶ Environments with exposure to hazardous substances beyond CE Type 3/4/5/6 certification
- ▶ Environments with conditions of excessive heat

### Limited use

Do not wash

Do not dry clean

Do not bleach

Flammable — keep away from sparks or flames

Do not iron

Single use — do not re-use

Do not tumble dry

### Storage and disposal

- ▶ Store in dry, clean conditions in original packaging
- ▶ Store away from direct sunlight, sources of high temperature, and solvent vapours
- ▶ Store within the temperature range -20°C to +25°C (-4°F to +77°F) and with relative humidity below 80%
- ▶ Shelf life is ten (10) years from date of manufacture when stored as stated above
- ▶ Replace garments if damaged, heavily contaminated or in accordance with local work practice
- ▶ Handle and dispose of contaminated garments with care and in accordance with national regulations

### Applications and performance

**Non-Hazardous Particulates**

Yes

**Liquid Continuous Contact**

Yes, if chemical is compatible with suit material<sup>1</sup>

**Non-Hazardous Liquid Splash**

Yes

**Hazardous Liquid Splash**

Yes, if chemical is compatible with suit material<sup>1</sup>

**Non-Hazardous Liquid Spray**

Yes

**Hazardous Liquid Spray**

Yes, if chemical is compatible with suit material<sup>1</sup>

**Hazardous Dusts and Fibres**

Yes

**Organic Solvents**

Yes, if chemical is compatible with suit material<sup>1</sup>

**Gases and Vapours**

No

**Acids/Alkalis**

Yes, if chemical is compatible with suit material<sup>1</sup>

<sup>1</sup> For additional chemical penetration and permeation data, please call your local 3M Technical Service Representative. Typical applications may include: chemical handling, environmental cleanup, hazardous waste remediation, agriculture.

In all cases, a risk assessment should be carried out. Always read product user information. Use limitations and performance data should be considered to ascertain the protection required. If in doubt, contact a safety professional.

For more information on 3M products and services please contact 3M.

## Technical data

The following tables show the performance of this product when tested under laboratory conditions. Please note that the tests may not reflect the reality of use and do not account for factors such as excessive heat and mechanical wear. The data listed in the tables below is based on one sample only.

| Test   | Standard/test method | Class/result     |
|--|----------------------|------------------|
| Abrasion resistance (visual assessment)                            | EN530:2010           | Class 5          |
| Flex cracking (visual assessment)                                  | ISO 7854:1995        | Class 1          |
| Tear resistance  | ISO 9073-4:1997      | Class 2          |
| Tensile strength   | EN ISO 13934-1:1999  | Class 1          |
| Puncture resistance  | EN 863:1995          | Class 2          |
| Bursting resistance  | EN ISO 13938-1       | Class 2          |
| Resistance to ignition   | EN 13274-4:2001      | Pass             |
| Resistance to blocking   | EN 25978:1990        | No blocking      |
| Seam strength  | EN ISO 13935-2:1999  | Class 3          |
| Repellency to liquids – 30% H <sub>2</sub> SO <sub>4</sub>         | EN ISO 6530:2005     | Class 3 of 3     |
| Liquid penetration resistance – 30% H <sub>2</sub> SO <sub>4</sub> | EN ISO 6530:2005     | Class 3 of 3     |
| Repellency to liquids – 10% NaOH                                   | EN ISO 6530:2005     | Class 3 of 3     |
| Liquid penetration resistance – 10% NaOH                           | EN ISO 6530:2005     | Class 3 of 3     |
| Repellency to liquids – n-heptane                                  | EN ISO 6530:2005     | Class 2 of 3     |
| Liquid penetration resistance – n-heptane                          | EN ISO 6530:2005     | Class 3 of 3     |
| Repellency to liquids – Isopropanol                                | EN ISO 6530:2005     | Class 3 of 3     |
| Liquid penetration resistance – Isopropanol                        | EN ISO 6530:2005     | Class 3 of 3     |
| Anti-static coating on inside only                                 | EN 1149-1:2006       | Pass             |
| Radioactive particulates   | EN 1073-2:2002       | TIL Class 2 of 3 |
| Biological protection  | EN 14126:2003        | Pass             |
| Synthetic blood penetration resistance                             | ISO 16603:2004       | Pass 20kPa       |
| Blood-borne pathogen penetration resistance                        | ISO 16604:2004       | Class 6          |
| Contaminated solid particle penetration resistance                 | ISO 22612:2005       | Class 3 of 3     |
| Contaminated liquid aerosol penetration resistance                 | ISO/DIS 22611:2003   | Class 3 of 3     |
| Wet bacteria penetration resistance                                | EN ISO 22610:2006    | Class 6          |

The standards EN 13034:2005, EN 14325 and EN ISO 13982-1:2004, and EN 1073-2:2002 define performance classes. The maximum Class is 6 unless otherwise noted.

## Permeation test results

| Phenol 85% soln.                        | 108-95-2   | Class 6                               | Not tested                            | Class 6                               | >480 (H)                              |
| Phosphoric acid 85%                     | 7664-38-2  | Class 6                               | Not tested                            | Class 6                               | >480 (H)                              |
| Potassium chromate (saturated soln.)    | 7789-00-6  | Class 6                               | Not tested                            | Class 6                               | >480 (H)                              |
| Sodium bisulphate 40% soln.             | 7681-38-1  | Class 6                               | Not tested                            | Class 6                               | >480 (H)                              |
| Sodium fluoride saturated soln.         | 7681-49-4  | Class 6                               | Not tested                            | Class 6                               | >480 (H)                              |
| Sodium hydroxide 40wt%                  | 1310-73-2  | Class 6                               | Not tested                            | Class 6                               | >480 (H)                              |
| Sodium hypochlorite (13% chlorine)      | 7681-52-9  | Class 6                               | Not tested                            | Class 6                               | >480 (H)                              |
| Sulfuric acid 30wt%                     | 7664-93-9  | Class 6                               | Not tested                            | Class 6                               | >480 (H)                              |
| Sulfuric acid 93.1 wt%                  | 7664-93-9  | Class 6                               | >480 (H)                              | Class 6                               | >480 (H)                              |
| Zinc bromide saturated soln.            | 7699-45-8  | Class 6                               | Not tested                            | Class 6                               | >480 (H)                              |

Data given here is: for information only; not certified product claims; based on one sample only; based on lab conditions; subject to change. Product supplied may show variation. Breakthrough times are not safe wear times. Permeation rates increase with temperature. Permeation testing does not assess: degradation; mechanical defects; product design/fit.

Test methods referenced are EN 374 and ASTM F-739. EN 374 reports the breakthrough detection time at a permeation rate of 1.0 µg/cm<sup>2</sup> and refers to the EN 14325 classification in the table. ASTM F-739 reports the normalised breakthrough detection time at a permeation rate of 0.1 µg/cm<sup>2</sup> and refers to the ANSI 103 classification stated in the table. Both normalised permeation rates of 0.1 µg/cm<sup>2</sup> and 1.0 µg/cm<sup>2</sup> are reported in EN ISO 6529.

**LIMITATION OF LIABILITY:** Except as provided above, 3M shall not be liable or responsible for any loss or damage, whether direct, indirect, incidental, special or consequential arising out of the sale, use or misuse of 3M OH&ESD products, or the user's inability to use such products. THESE REMEDIES SET FORTH HEREIN ARE EXCLUSIVE.

| EN 14325 Classification |           | ANSI 103 Classification |           |
|-------------------------|-----------|-------------------------|-----------|
| Class 6                 | >480 mins | H                       | >480 mins |
| Class 5                 | >240 mins | M                       | >120 mins |
| Class 4                 | >120 mins | L                       | >30 mins  |
| Class 3                 | >60 mins  |                         |           |
| Class 2                 | >30 mins  |                         |           |
| Class 1                 | >10 mins  |                         |           |

## IMPORTANT NOTICE

The use of the 3M product described within this document assumes that the user has previous experience of this type of product and that it will be used by a competent professional. Before any use of this product it is recommended to complete some trials to validate the performance of the product within its expected application.

All information and specification details contained within this document are inherent to this specific 3M product and would not be applied to other products or environment. Any action or usage of this product made in violation of this document is at the risk of the user.

Compliance to the information and specification relative to the 3M product contained within this document does not exempt the user from compliance with additional guidelines (safety rules, procedures). Compliance to operational requirements especially in respect to the environment and usage of tools with this product must be observed. The 3M group (which cannot verify or control those elements) would not be held responsible for the consequences of any violation of these rules which remain external to its decision and control.

Warranty conditions for 3M products are determined with the sales contract documents and with the mandatory and applicable clause, excluding any other warranty or compensation.
