

Howard Leight™ Impact® Sport

Tactical Black Electronic Protective Earmuff

Honeywell Impact Sport by Howard Leight keeps wearers protected from hazardous noise and connected to their environment. Impact Sport employs built-in directional microphones that amplify range commands and other ambient sounds to a safe 82dB, providing more natural listening and enhancing communication. For protection, Impact Sport actively listens and automatically compresses amplification when ambient impact sound reaches 82dB, and passively blocks out noise at 22dB.

Patented Air Flow Control technology delivers optimal passive attenuation across all frequencies, without increasing earcup size or weight. A patented baseplate chamber and high-tech non-woven layer manage the flow of air inside the earmuff to control how sound reaches the ear. The result is better, more consistent overall attenuation for virtually all industrial noise environments.

PERFORMANCE PROFILE

Tactical Black style matches uniform

Protection against harmful noise

Soft headband

Low energy-consuming 4-hour automatic shut-off

Amplifies low-level sound up to 4 times

Folds for convenient storage

Connects to iPod, MP3 and other devices

Patented Air-Flow Control Technology
