

Honeywell 7700 Lunchbox Asbestos & Silica Kit

Product description

The Honeywell 7700 series half mask asbestos and silica kit is the quality choice for workers requiring protection when working around asbestos contaminated material. The kit comes complete with half mask and P2/P3 rated Pancake filters, plus 6 mask cleaning wipes. Pancake filters are flexible and lightweight, for continued wear.

Lunchbox Packaging provides great storage for the mask and filters to keep them clean and to stop filters being clogged up with dust when not in use.

Handy Kits make filter selection easy!

FEATURES

- Lunchbox Packaging provides great storage for the mask and filters to keep them clean and to stop filters being clogged up with dust when not in use.
- Handy Kits make filter selection easy!
- Pancake filters are flexible and lightweight for continuous wear.
- 100% silicone half mask is latex free meaning no latex allergens & are safe for workers with allergies
- Low "dead air" space in mask, means less exhaled breath is re-breathed which encourages Increased worker productivity
- Strategic placement of exhalation valve allows more breath to be exhaled out of the mask faster leaving workers feeling cooler & more comfortable

7700 SERIES HALF MASK ASBESTOS / SILICA KIT

Professional Respiratory Protection

RHSP7700P2 / RSLAB-7700-6

APPLICATIONS

- Suits applications where there is limited exposure to asbestos or silica related materials. Electricians, building, construction, maintenance,. Refer to Limitations of use for further detail.

Technical Details

Mask Material:	100% Silicone
Filters:	Includes a set of P3 rated flexible pancake filters (which are P2 rated when used with a half mask).
Limitations of use:	Not for use in IDLH environments including atmospheres with less than 19.5% Oxygen. A respirator or RPE should be worn at all times by workers in any environment where asbestos is or suspected to be present to minimise the risk of breathing in asbestos. Before working with or around asbestos, please refer to Safe Work Australia, National Code of Practice for the Safe Removal of Asbestos or Worksafe NZ for guidance on how to manage and control asbestos in the workplace. This kit must NOT be used for restricted removal of asbestos. For any mixture of asbestos types, or where the composition is unknown, the TWA (ppm) is set at .01 f/mL. Refer to http://hsis.safeworkaustralia.gov.au and www.worksafe.govt.nz for more detail regarding Hazardous Substances and Exposure Standards.
Country of Origin:	USA

Standards

Certified to AS/NZS 1716:2012 License SMK 0563
