

Pilot Mounting Systems

Pilot 1 Metre Cones

Standard 1 metre traffic cones, with a rubber base and reflective collar, weigh 6.4kg. They are available in Red or Yellow and accept any Pilot accessories fitted with cone adaptors. Additional rubber base weights add approximately 5.3kgs and are recommended.

Hi-Line Post & Base

An 8.7kg moulded rubber base and 63mm diameter Yellow UPVC post provide stability and durability. The post includes a Twist-lok receiver to accept the Pilot belt unit and accessories.

Pilot Removable In-Floor Post

Pilot removable in-floor posts are available in either polished stainless steel or durable UPVC plastic. The 63mm posts use a pin and socket design that allows them to be quickly deployed and removed without tools, leaving the floor clear of potential tripping hazards. The posts Twist-lok receiver can accommodate the Pilot accessories shown below.

Pilot Fixed In-Floor Post

Pilot fixed in-floor posts are available in either polished stainless steel or durable UPVC plastic. The 63mm posts utilise an aluminium slip post design that allows them to rotate easily for belt alignment while reducing the risk of unauthorised removal. The posts Twist-lok receiver can accommodate the Pilot belt units along with the accessories shown below.

Pilot Removable Spike Post

Pilot removable spike posts are available in durable UPVC plastic only. The 63mm posts use a 200mm long galvanised steel spike that allows them to be quickly deployed using foot pressure and removed again when necessary. Use

in grassed or soft gravel areas for temporary applications. The posts Twist-lok receiver can accommodate the Pilot belt units and the accessories shown below.

Pilot High 5 Hook Accessory

Pilot High 5 is a handy Twist-lok hook accessory that connects with any Pilot post, cone or wall/magna mount to create a versatile hanging point. Useful for keeping leads suspended off the floor or as a staging point for safety vests etc.
