Fall Protection

SafetyLink's temporary roof anchor has been designed for use where an anchor is required for a temporary period of time in a location that does not need to be revisited. TempLink 3000 is a patented multi-directional fall device designed to absorb energy when a fall is arrested.

- 316 stainless steel.
- Lightweight compact unit, enabling easy manoeuvring to desired location.
- Easy to secure tabs.
- Single person temporary roof anchor.
- Rated at 15kN.
- Complies with AS/NZS 1891.4.

Benefits of choosing SafetyLink:

The TempLink 3000 is a temporary roof anchoring device that can be installed onto a metal or tile roof. The TempLink 3000 is an extremely useful item for any person wishing to do roof maintenance where there is no permanent safety anchors. This new height safety anchor point design incorporates the same stand out features of all our height safety anchors maximising energy absorption. This dynamic design reduces the load back onto the structure and the person attached to the temporary roof anchor.

- Easy to install.
- One person temporary roof anchor.
- Detailed, easy to read installation instructions.
- Free technical advice regarding installation and use.
- Complies with Australian and New Zealand standards.

The TempLink 3000 is a multi-directional roof anchor. A fall is never an anticipated event therefore the direction of your fall cannot be accurately predicted. The TempLink 3000 is designed and tested as multi-directional.

SafetyLink will provide you with the following:

- All products tested and manufactured to Australian and New Zealand Standards.
- All distributors and installers are trained to use SafetyLink products.
- Supply installation guides, testing results and product sheets.
- Layout Design Service providing compliant roof safety systems.
- Supply a large range of roof anchors that protect you from the ground up, allowing complete access to your roof.
- Installers are qualified to do yearly inspections on your anchors as per Australian and New Zealand Standards.
