

SpillSmart General Purpose Pads have been designed to rapidly absorb hydrocarbon and water based spills including Oil, Fuel, Coolant, Degreasers, Brake Fluid and Paints. They are also effective for the cleaning up of body fluids, sewerage, milk and all non-aggressive liquids. Absorb spills, drips and splashes in and around machinery, tool and tank wipe downs or for a final clean after taking up a spill with loose particulate absorbents. They are premium quality, Heavy Duty and provide the strength and durability required to absorb a wide variety of spills. These Pads will cover most land based situations and are supplied in bales of 100.

Envirosmart has a great range of premium absorbent pads to take care of a huge variety spills. Please speak to your local distributor for further information.
