

SpillSmart General Purpose Socks have been designed to provide a highly absorbent barrier preventing liquids from escaping on hard surfaces or down drains. They can also be placed around machines or drums to contain leaks.

These socks have been manufactured with a poly spun bonded outer layer and contain an organic cellulose fill. They will rapidly absorb hydrocarbon and water based spills including Oil, Fuel, Coolant, Degreasers, Brake Fluid, Paints and other non-hazardous liquids. Socks are colour coded for safety and are easy to mould and shape around leaking equipment or a spill.

EnviroSMART has a great range of premium absorbent socks to take care of a huge variety spills. Please speak to your local distributor for further information.
